HTTPS

Hypertext Transfer Protocol Secure (HTTPS) is an extension of the Hypertext Transfer Protocol (HTTP).

It is a combination of HTTP and SSL (Secure Socket Layer) protocols.

HOW DOES IT WORK?

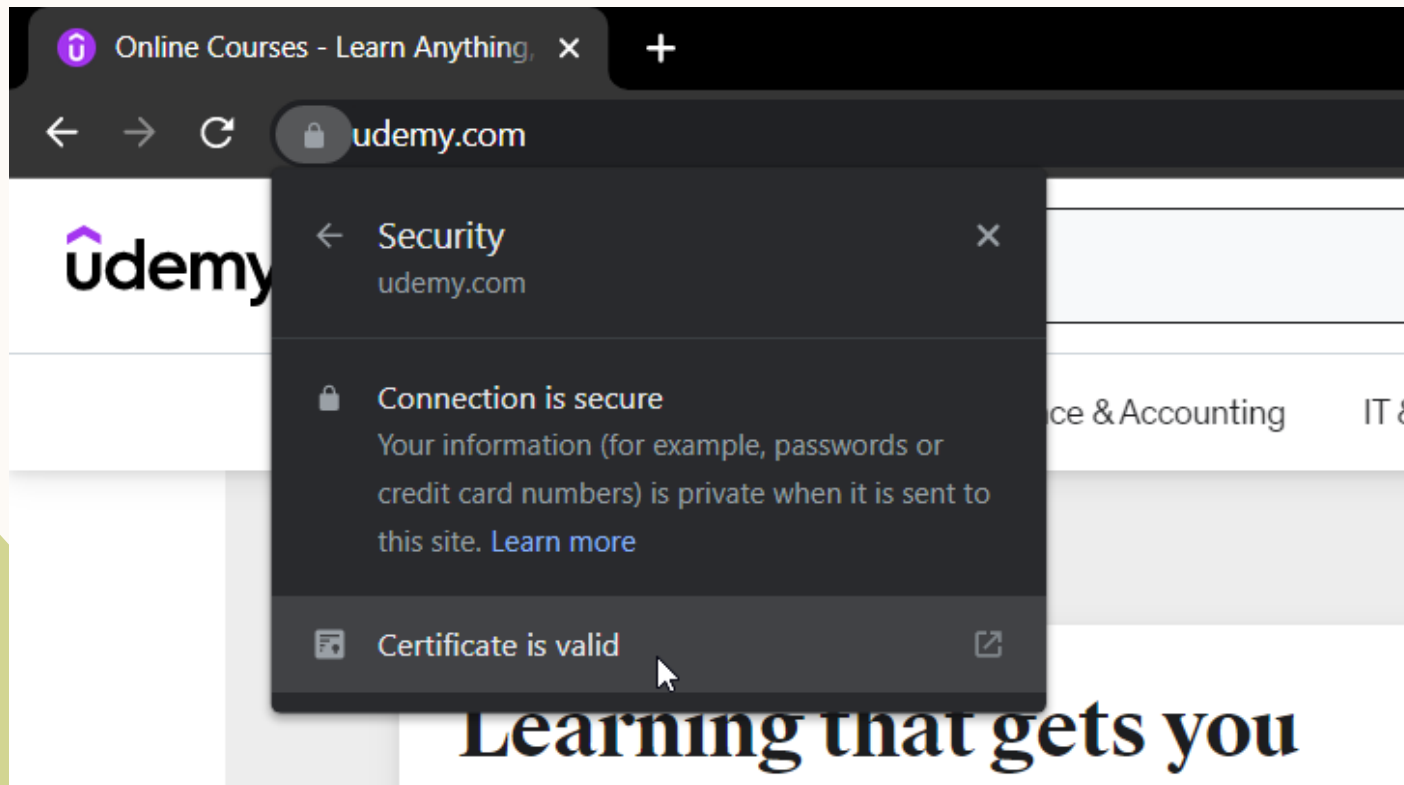

HOW DOES IT WORK?

SSL AND TLS

SSL and TLS are cryptographic protocols that encrypt and authenticate data transfer between servers, systems, applications and users.

THE CERTIFICATE

The background features a large, light cream-colored circle on the left and a large, light pink circle on the right. These two circles overlap in the center. The top and bottom areas outside these circles are filled with a dark blue color. In the top right corner, there are several thin, white, concentric curved lines that follow the edge of the pink circle.
