WHAT'S THE INTERNET?

The internet is a globally connected network system facilitating worldwide communication and access to data resources through a vast collection of private, public, business, academic and government networks.
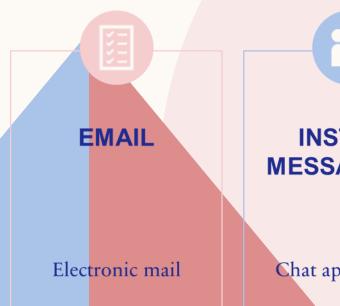

WHAT ABOUT THE WEB?

The terms 'Internet' and 'World Wide Web' are often used interchangeably, but they are not exactly the same thing; the internet refers to the global communication system, including hardware and infrastructure, while the web is one of the services communicated over the internet.

INTERNET SERVICES

Internet = *Infrastructure that provides services to applications*

INTERNET SERVICES

Internet = *Infrastructure that provides services to applications*

EMAIL	INSTANT MESSANGING	VOIP	WEB SURFING	GAMING
